

## Complete Care

MSP[RS] Resistant Starch is a natural all-in-one solution designed to be consumed by newborn piglets, helping to improve gut health, support the immune system and works to keep piglets warm and dry too!

## COMPLETE SOLUTION

MSP[RS] is a simple and effective way to manage gut health in piglets from newborns to the finisher/grower stage. It's gentle enough to feed to newborns, and works well at developing the microbiome to help keep piglets healthier at critical life stages. MSP[RS] feeds the microbiome to defend the lining of the gut, fuels the colonocytes to improve the first line of defence, and keeps piglets healthier and more productive through their lifetime. It's a simple and cost-effective tool to manage disease in the barn!

**DRY** 

Gentle and safe to use with newborn piglets, this palatable product can be introduced to piglets as a drying agent that works quickly to ensure babies are warm and dry.

**DEFEND** 

Support healthy immune function by increasing the population of healthy flora and decreasing pH levels in the gut creating an environment that is unfavorable for harmful pathogens.

**COMPLETE SOLUTION**

Proven effective through clinical trials, and effective at a low dose, this natural health product combines the benefits of a conditioner with a gut health solution that can be introduced at birth, and used as a familiar wellness solution through all life stages.

**mSP[RS]**  
RESISTANT STARCH

**DIGESTION** 

Improve intestinal health and build a better digestive system by developing the microbiome, starting day one! This product has been clinically proven to improve fecal scores and reduces scours in piglets.

**DIETARY** 

This dietary aid helps to improve the absorption of vitamins, minerals and nutrients in swine. It also helps to balance electrolytes and eases the process of dietary transition.

Experts agree that we need to start early with our piglets. Improve their gut health on day one!
